

PROFESSIONAL DEVELOPMENT EVENT: FOSTERING ONLINE COLLABORATION USING WIKIS A CLICK U LIVE! REPLAY

Many projects that we work on involve some form of collaboration. Your team members might work in the same office or be around the world. Teams need an online space and tools that support group conversations, planning, and collaborative content creation. Existing tools can be cumbersome for sharing files, annotating them, supporting editorial discussions, and

managing archiving and version control. Find out how wikis can help teams collaborate and share knowledge. The flexible, self-organizing nature of wikis and their ease of use make them an ideal tool for creating instant intranets or web sites, team areas, or library/IT documentation areas. Find out more about wikis, how some libraries have successfully used them, and how wikis fit into your collaboration toolbox. Find out where you can set up a hosted wiki or install your own wiki software to test it out.

Thursday March 22nd - 5:30 pm

Mellon Institute, Social Room (3rd Floor)

4400 5th Avenue - Oakland
