The Internet Archive, a 501(c)(3) nonprofit, was founded to build an Internet library with the purpose of offering permanent access for researchers, historians, and scholars to historical collections that exist in digital format. Founded in 1996 and located in the Presidio of San Francisco, the Archive has been receiving data donations from Alexa Internet and others. In late 1999, the organization started to include more well-rounded collections. Now the Internet Archive includes texts, audio, moving images, and software, as well as archived web pages, in its collections.
